Federal Supply Schedule 42 I B Firefighting and Rescue Equipment

RESPIRATORY PROTECTION

A component of any safety program is respiratory protection. But even the best product will not provide the desired level of protection if it does not fit properly or is not worn during all times of exposure. 3M provides comprehensive training programs in the use of respiratory products, offering a broad line of videos and literature to inform workers of general safety practices and to assist in respiratory selection, fitting, and regulations compliance.

3M's new line of particulate respirators offers users an effective way of meeting NIOSH 42 CFR 84 standards. These respirators have many advantages such as comfort, easy breathing, lightweight materials, adjustable straps, as well as overall economy.

The 6000 series respirators provide versatility, comfort, and ease of use. The low maintenance design minimizes time required to maintain the product. The 7000 series respirators are designed to accommodate a wide variety of cartridges, filters, and combinations. These are durable and proven respirators that can be used in many applications. Breathe Easy Powered Air Purifying Systems provide comfortable, efficient powered air protection.

CALGON PRODUCTS

Check out these name brand hand cleaners, shampoos, and soap products available from The Calgon Corporation:

- **APPROVE** – an off-white, viscous, general-purpose hand cleanser with a mild lemon fragrance. It has category E1 approval by the USDA.
- **Lotion Klenz** – LTS Lotion Soap and PAC Lotion Soap are pink, viscous, general-purpose hand cleansers. Each is extremely effective on the heaviest of soils, yet mild enough for general office use. Lotion Klenz and LTS Lotion Soap have category E4 approvals by the USDA.
- **PAX – LANO – SAV** – a granulated skin cleanser blended with natural vegetable scrubbers and emollients to provide gentle, effective cleansing. It contains no harsh irritants or abrasives. It has category E4 approval by the USDA.
- **Skin Care Lotion** – a light blue, protein and emollient enriched skin lotion containing ingredients noted for their effective soothing, softening, and moisturizing properties. It has category E4 approval by the USDA.
- **Tuff – N – Easy** – a heavy-duty skin cleanser with natural scrubbers for heavy-duty soil removal. It contains no kerosene or petroleum distillates.
- **Tuff POW'R** – a white lotion “waterless” hand cleanser that may be used with or without water to quickly and gently remove a wide variety of soils.
- **Vestal TEC - Orange Lotion Scrubbers** – orange in appearance with fragrance, heavy-duty skin cleanser. Designed for use with water to remove stubborn soils. Category E1 approval by the USDA.

Soap Dispensers are also available.

Federal Supply Schedule 74 IV
Office Equipment Products and Services

**METRIC CONVERSION
CALCULATOR**

The World's Easiest To Use Metric Conversion Calculator

We live in a metric world and metric is the international language of measurement just like English is the world's language of business. The 1-step Metric Conversion Calculator plus is an instant English and metric conversion calculator plus a calculator with the power of a micro computer that **immediately** converts U.S. inch-pound temperature, length, weight (mass), area, and volume (cubic and liquid) to metric equivalents and vice versa.

The calculator converts fractions to decimals and decimals to the nearest 1/64 fraction. Usage can be for business, construction, teaching, travel, students, engineers, and architects. Best of all, it's now available under Federal Supply Schedule Group 74, Part IV. For additional information call or contact:

NEW AVIONICS BROCHURE

We have recently printed a new publication, which describes the items we currently have under contract in the area of Avionics Products. GSA now offers, under our Federal Supply Schedule Program, commercially available, off-the-shelf, state-of-the-art flight data recorders (better known as aircraft "black boxes"), structure analyzers, data transfer interface units, recorder systems, audio systems, aircraft monitoring data management systems, high integration air data computers and other avionics supplies and services for both military and commercial aircraft usage.

The publication describes and pictures the items under contract and provides names and phone numbers of contact points for further information and to place your orders.

To receive your copy of this new publication, please contact Stephanie Peat by phone at (703) 305-6097, by fax at (703) 305-7135, or E-mail at stephanie.peat@gsa.gov

THE SIDEWINDER SOLVENT RECYCLER

From Persyst Enterprises,
The Sidewinder Model M-2

The *Sidewinder Model M-2* Solvent Recovery System is the first UL Listed Solvent Recycler in the **WORLD!** Persyst Enterprises has offered the government a new line of solvent recovery systems. The *Sidewinder M-2* recycles hazardous wastes for commercial paint and finish contractors, industrial and government paints finish and coating users also, automotive paint and finish users. The *Sidewinder M-2* has single button operation, an efficient refrigeration condensing system; it is ozone safe and self-monitoring with safety failsafe, cool down and shutoffs.

This unit has been evaluated for use in normal, non-hazardous locations and listed by Underwriters Laboratories, Incorporated, in compliance with UL 2208 Standard for Solvent Distillation Units.

NEW AWARD MADE TO QORE, INCORPORATED

QORE Incorporated was awarded contract number GS-24F-0029J, covering Laboratory Testing and Related Services. The Special Item Numbers awarded were 873-1, entitled Mechanical Testing and Analysis; and 873-2 entitled Chemical Testing and Analysis and 873-4 entitled Geo-technical/Thermal Testing and Analysis. The contract period is September 16, 1999 through August 31, 2004.

QORE, Incorporated, formerly known as Atlanta Testing and Engineering (AT&E) was founded as a testing and engineering company 30 years ago. They have over 22 offices located in the Southeast, and maintain seven major laboratories and ten smaller laboratories. QORE, Incorporated services include but are not limited to, metal testing, ultrasonic testing, paint coating thickness, failure analysis, terrain conductivity meter testing, soil-gas radon surveying, geo-technical tests, geo-synthetic tests, field tests, concrete tests and roofing material testing.

Chemistry, Biochemistry and Clinical Instruments and Services

**MICROBIOLOGY INTERNATIONAL
 AWARDED CONTRACT**

Microbiology International was awarded a contract for the following Special Item Numbers:

| Item No: | Description: |
|-----------------|---|
| 66-113 | Hand Operated Pipettors and Pipetting, Diluting and Dispensing Devices and Systems, Accessories and Options |
| 66-117 | Automated Laboratory Robotic Labware Handling Devices and Systems, Accessories and Options |
| 66-122 | Video Image Analyzers and Analysis Systems, Accessories and Option |

Microbiology International was awarded a contract for Pourer/Stacker, Medical Preparators, Spiral Plater, and the Protocol Colony Counters. The Pourer/Stacker, Media Preparators and Spiral Plates are all systems that are designed to automate the inoculation process of plates that will be undergoing tests and inspection. One type of inspection is counting bacteria colonies or zones. This process is done by the computer based system (S8000 Protocol Colony Counters). This particular system is capable of reading more than 1000 plates per hour. The results (number and images) are stored in the computer for later processing if necessary. The computer includes a program that is responsible for the counting process called Gene Genius.

The period of the contract is July 2, 1999 through July 1, 2004.

In this catalog, you can choose from a large array of copiers, accessories and supplies; customer support and training; maintenance and repair options; and new and innovative document solutions programs which include document conversion services and records management services. Need copies? Contact the Centralized Mailing List Service, 501 W. Felix Street, Ft. Worth, TX 7611, and (817) 334-5215. For additional information contact the Office and Scientific Equipment Center at (703) 305-6626.

Federal Supply Schedule 66 II J Test and Measurement Equipment and Services

CLARKE-HESS COMMUNICATION RESEARCH CORPORATION

Our Office and Scientific Equipment Acquisition Center recently awarded a contract to Clarke-Hess Communication Research Corporation for two pieces of test and measurement equipment. Both of these items can now be found on Federal Supply Schedule 66 II J, Test and Measurement Equipment and Services, and fall under Special Item Number 602-6, Electrical and Electronic Parameters Standards and Calibration Instruments. This equipment is used to correct variations in accuracy between the instruments being compared.

The Clarke-Hess Model 6000 Phase Meter automatically selects the proper range for both amplitude and phase and is waveshape independent. The user only needs to connect the two input cables to obtain a phase reading. Overrange and Underrange LED's indicate whether either of the two input signals is too large or too small.

The Clarke-Hess Model 5500 Digital Phase Standard is also easy to calibrate and easy to use. Only single keystrokes on clearly labeled keys are required to enter all of the parameters into the Model 5500. A large display shows Phase, Frequency and both output Amplitudes at all times. The combination of phase accuracy, amplitude accuracy and low distortion from each channel make the Model 5500 effective for calibrating Phase Meters, Vector Voltmeters, Broadband Wattmeters and Power Analyzers, Resolvers and other Phase Sensitive instruments.

The GSA contract number is GS-24F-0005K. For more details about these items, and to place your orders, contact:

Mr. Ken Salz
Clarke-Hess Communication Research Corporation
Phone: (212) 255-2940
Fax: (212) 691-8158

WANTED!!!! YOUR OLD CATALOGS!

(Household Appliances August 1993)

(ASAP Summer 1996)

(Export Appliances October 1996)

Are you still using information from one of these old Appliance catalogs?

It's time to clean house ... and toss outdated catalogs. These catalogs contain NSN and pricing information that is not only old, but may also be obsolete. Over the past year, the Federal Supply Service Hardware and Appliance Acquisition Center, has been busy converting their ASAP and Special Order Program appliance contracts to a Multiple Award Schedule (MAS) contract for both domestic and export appliances. By awarding contracts to vendors under a MAS, we can offer you a larger variety of both vendors and product line — larger than ever before. Although MAS may be a new concept to you, they are really quite easy to use. For additional information regarding MAS, please refer to our GSA web site <http://pub.fss.gsa.gov/sched> or contact the Centralized Mailing List Service at (817) 334-5215 for a copy of our 1999 publication "ABCs of Multiple Award Schedule Purchasing".

How can I get a new Appliance Catalog? Once under contract, the vendors will provide our customers with a catalog and a price listing of their product line that is on the MAS. Simply select a vendor or several vendors and contact the Government Representative listed on the MAS. Some of our Appliance vendors actually have web sites linked to our Hardware and Appliance Center web site where you can view their products on-line.

How do I find this new information? To view this information on-line, just follow these steps through our web site:

- Step 1:** Visit www.r6.gsa.gov/hac for the Hardware and Appliances Center homepage
- Step 2:** Click on the "Appliances" listing to take you to the Appliances information page
- Step 3:** Click on "MAS 41 I Vendor Listing" for a matrix of vendor government representatives, phone numbers, appliance brands and product lines
- Step 4:** Click on "Multiple Award Schedule 41 I for Household and Office Appliances" for a word document of the actual schedule
- Step 5:** Click on "Appliances Vendors" for links to vendor web sites and product information

You can also find appliance information on **GSA Advantage!** by doing a search for vendor names or types of products and through the FSS Schedules E-Library at www.fss.gsa.gov

To obtain a hard copy of the Appliance Schedule 41 I, contact the Centralized Mailing List Service at (817) 334-5215. You can request a copy of this MAS and/or the Vendor Representative listing from our Fax-on-Demand service, call (816) 926-1661 and follow the menu directions.

For additional questions or comments, contact Gail Allen at (816) 926-2389.

Thanks for visiting our Fax-on-Demand service and check back with us occasionally for new information.

Now Available! One-Stop Shopping for Concrete Repair and Polymer Flooring Products

Thermal-Chem Offers 59 Products
Under GSA Contract #GS-10F-8864H
